Policies and Standards Environmental Policy

Our Commitment

We recognise that our activities impact on the environment. Consequently we embrace the principles of sustainable development and we are committed to a process of continual environmental improvement and pollution prevention.

Our aims

Minimise and conserve...

We shall identify opportunities to reduce the resources we consume including energy, water and other natural resources, thereby also minimising the amount of waste we produce. Where practicable, we shall reuse materials, recycle waste and procure recycled products.

Comply...

We shall endeavour to comply with all relevant environmental legislation and regulations. Moreover we shall treat these as the minimum standard and seek to exceed them wherever possible.

Measure and monitor...

We shall implement and document an environmental management system (EMS) that will provide the framework for setting and reviewing environmental objectives and for measuring performance. The Directors will annually review the EMS to ensure the policy; programmes and procedures continue to reduce our environmental impact.

Involve and communicate...

We shall document and communicate our policy to employees, suppliers, business partners and the public and provide the necessary training and resources to support the implementation of our policy.

Signed:

Mr Graham Clarkson
Managing Director
